

Designed to assist in Bolus feeding for Pre-Term infants.

The Gavage Syringe Restraining Device (GSRD) "Manger" was designed to provide a protected area for the premature infant. The colored tint protects infant's eyes from bright lights and also shields them from drafts. The manger fits easily and securely into a bassinet or radiant warmer. Allows for bolus feeding by gavage as well. Available in blue and amber acrylic.

- Saves Time
- Saves Costs
- Flexible Use In All Applications
- Reusable
- Designed for Mobility
- Strong Light Weight Design
- 15"W x 13"H x 11"L
